

chill out

Relax, your interior wall liners come from US Liner – the industry standard.
We protect the majority of OTR refrigerated trailers.

Bulitex

Ecotex

Versitex

When it comes to protecting your fleet and cargo, whether you purchase a standard reefer wall or reefer integral wall, shouldn't you run with the original?

Since introducing the original thermoplastic linings in 1998, durable reinforced composites from US Liner have gone on to protect more rigs than any other brand. Chances are your fleet is already protected with one of our engineered composites.

There's a reason no competitive system stacks up. After all these years...and all these miles...US Liner continues to innovate. We set the standards for overall durability and price performance.

Unmatched customer service.
Uncompromised strength.
Unquestioned leadership.
Specify US Liner.
