### **US Liner Company Announces the Hiring of Jack S. Hartnagel, Jr. as National Accounts Director**

**CRANBERRY TOWNSHIP., PA** – US Liner Company (USLCO), a leading manufacturer of advanced, thermoplastic composite solutions, has hired Jack Hartnagel as National Accounts Director. With 20 years of experience in the transportation arena, Mr. Hartnagel joins US Liner from Hyundai Translead of San Diego, California, where he worked as Sales Director, Southwest Region. He has also held management sales positions at Wabash National Company, Donaldson Company and Kellogg's Sales Company.

In his new position, Mr. Hartnagel will have sales responsibility to fleets and dealers for US Liner products including Versitex, Ecotex, Bulitex and Integral Wall Liners.

"We couldn't be more excited to have a seasoned professional like Jack join our team," stated Jeff Meek, Vice President of Sales and Marketing. "We're confident the experience and talent he brings to US Liner will prove invaluable." Michael LaRocco, USLCO President & CEO, is "pleased that Jack accepted the position and is taking on the challenge". According to Mr. LaRocco, "Jack has strong relationships and an excellent reputation in the industry, along with expertise in trailer specifications."

#### **About US Liner Company**

Headquartered near Pittsburgh, in Cranberry Township, PA, US Liner Company, a division of American Made, LLC, has two manufacturing plants and one fabrication plant nearby, all running 24/7. Since 1998, the US Liner has been a leading supplier of composite materials that are widely used in the truck/trailer market and supports an ever-widening range of applications in the automotive, RV, rail and intermodal transportation, building products and military markets.

US Liner's diverse line of engineered polypropylene composite materials continues to set new benchmarks for versatility and durability. US Liner's application development and manufacturing team provide materials solutions for exceptional durability, wear and impact resistance, weight savings, and protection from moisture and chemical intrusion.
