

# Save **BIG** on Genuine Reinforced Thermoplastic Side Skirt Panels

**Factory Seconds – Priced as low as \$49.95/ea.**

## *The Right Solution for Maintenance and Repair Shops*

We've all seen it — a makeshift repair on a damaged side skirt using rivets and glue. Why? Replacement costs can be expensive. Well now that can be a thing of the past.

**US Liner Company**, the leading manufacturer of reinforced polymer shields/panels used by many of the top brand side skirt manufacturers, **is now offering cosmetically blemished panels**. If your trailer has reinforced plastic side panels, chances are, we've made them.

If you're looking to **reduce costs** in your fleet's maintenance and repair operations, US Liner Company is offering **low prices** on genuine side skirt panels.

These panels are factory seconds with minor cosmetic irregularities and blemishes that cannot be sold as original at the OEM level or to side skirt manufacturers. Although these panels could not pass the rigid quality standards in appearance demanded by our OEM customers, **they are structurally sound and provide all the durability you've come to expect**. Most just have slight irregularities.

**Factory Seconds –  
Priced as Low as  
\$49.95**

Fleet service organizations can **reduce overall maintenance and repair costs through this first-ever factory seconds sale**. Because wind skirts typically suffer from "bumps and bruises" as trailers travel over the road, repairing damaged skirts with genuine USLCO factory seconds offers the opportunity to replace badly damaged skirts with durable high-quality seconds at a fraction of the cost.

These Versitex B-grade panels provide the same structural strength and benefits that have made Versitex the first choice of OEM's everywhere:

- **LIGHTWEIGHT**
- **HIGH STRENGTH**
- **MOISTURE AND SOLVENT RESISTANT**
- **CORROSION RESISTANT**
- **EASY TO INSTALL AND REPAIR**
- **EASY TO CLEAN**
